

CYRAQ® 1000 Sunlight-Readable Outdoor Digital Display Benefits

Now you can take advantage of the benefits of digital signage in outdoor settings winter, spring, summer, and fall. Utilize the impact of motion and sound to make your messages come alive.

- Deliver targeted promotions at the right time and place
- Personalize your communications on a one-to-one basis
- Engage your customer and reduce perceived wait times
- Provide compelling content to enhance the "customer experience"
- Build your brand and generate more repeat business
- Target high ROI applications to increase sales and profits
- Communicate critical information in severe environments

Multiple 40" LCDs can display a common image in window-wall applications in landscape or portrait orientation. Call for details.

Outdoor All-Weather Sunlight-Readable 40" Digital Display

Outdoor All-Weather Sunlight-Readable 40" Digital Information Display

CYRAQ® 1000

Introducing the CyRAQ 1000

The new CyRAQ 1000 Series of digital information displays has been developed to meet the need for a reliable cost-effective LCD display solution for use in all-weather outdoor video and digital signage applications.

For the past 25 years, CyberResearch has built industrial computers and LCD displays. Our products are in use at a majority of the Fortune 500 companies as well as in universities, government, and military worldwide. Our specialty is providing rugged LCD displays for use in severe industrial environments including manufacturing, R&D labs, process control, marine, off-shore oil drilling, and nuclear power plants. Over the years, we have learned how to design high performance cost effective displays that can stand up to the most demanding temperatures and weather conditions.

CyRAQ 1000 40-inch LCDs achieve extremely clear, sharp, high contrast images by utilizing *AR-Bonding™*. We pioneered this technology in the industrial field to reduce excessive light reflections which can cause a standard LCD to appear washed-out when viewed in direct sunlight. *AR-Bonding* also provides extra mechanical support to the LCD and completely prevents air-gap glass fogging due to condensation.

CyRAQ 1000 dynamic digital displays work under any standard Windows® or Macintosh® operating system, and feature standard HDMI, DVI, and other popular inputs. Visit CyRAQ.com for details.

Features

- Crystal-clear sunlight-readable LCD
- 1080p for high-definition video
- Integral video wall functionality
- Landscape or portrait mounting
- Rugged 304SS stainless-steel enclosure
- Easy-to-service modular construction
- Waterproof quick disconnect connectors
- All-season thermal management
- Energy-efficient "green" design

Models

- **CyRAQ 1040, FHD:**
40" outdoor digital information display, 1080p resolution (full high-definition)
- **CyRAQ 1040, HD:**
40" outdoor digital information display, 720p resolution (high-definition)
- **CyRAQ 40 indoor models** also available
- **Custom engineered modifications optional**

*Highest Image Quality
Durable 304SS Enclosure
All-in-One Solution*

Applications

-  Restaurants
-  Public Spaces
-  Transportation
-  Entertainment
-  Outdoor Video
-  Industrial & Gov't
